Re: Docket # 98N-1038 "Irradiation in the production, processing
and handling of food"

To Whom It May Concern,

6325 '99 JUL 22 A9:48

I am writing in regard to the labeling requirements of irradiated food. I feel that consumers need to have choice in their food purchases; when products are not labeled, this choice is taken away.

I believe foods that have been irradiated, or contain ingredients that have been irradiated, need to be clearly labeled with a written statement of treatment. The radura sign should be used in conjunction with

98N-1038

C4446

this clearly written statement.

Please support the consumers right-to-know in food safety choices.

Sincerely

Ellen L. Gray
